

Vocalizer for Network 5

is the complete spoken output engine for network speech applications. Callers hear a seamless flow of speech, free from undesirable artifacts such as clicks and gaps that surface when using separate systems for playback of recordings and for computer generated speech.

Nuance has built an extensive offering of Vocalizer 5 voices, designed to provide a superior caller experience. The standard library currently offers 40 languages and 51 voices. Vocalizer 5 Basic offers 3 languages in 3 voices.

Vocalizer 5 Language and Voice Availability

40 Languages / 51 Voices

The following languages and voices are currently available. Ten additional languages will be rolled out over the next two quarters, and new voices and languages will be added on an ongoing basis beyond that. Note that all Vocalizer 5 voices support PromptSculptor and ActivePrompts by default.
